

Warwick Hart

Developer, www.warwickhart.com

contact@warwickhart.com | +44 7926 274 899 | Burgess Hill, UK

Summary

Motivated software developer with a passion for problem-solving who has just completed a 12-month coding course, to obtain a diploma in full stack development achieving a distinction. With a proactive mindset to understanding root causes of issues and finding innovative solutions. Eager to contribute skills and enthusiasm to a dynamic tech team. Portfolio showcases projects and demonstrates diverse abilities. Seeking a role as a developer in the tech industry to make a meaningful impact. Excited to connect and discuss how qualifications align with organizational needs.

Technical Skillset

I am experienced in various languages and technologies, and I have a knack for quickly learning new ones through self-study. My expertise includes **React, Django, Python, TypeScript, jQuery, Bootstrap, JavaScript, CSS, HTML, Lua, VBA, SQL, GitHub, Git** and **Heroku**.

Portfolio

The best way to see my portfolio, the repositories, and the live sites is by visiting my website www.warwickhart.com.

Squad Up - https://github.com/BobWritesCode/squadup_frontend

React | Django Rest Framework | API | React Bootstrap | Bootstrap | JavaScript | CSS | HTML | Git |

Full-stack website built using React for the front-end and Django Rest Framework for the backend. The website utilizes APIs and data fetching to ensure that users always have the most up-to-date information. It includes features such as social postings and provides an intuitive user interface for finding and managing groups.

Gamer's-verse - <https://github.com/BobWritesCode/server-directory-website>

Django | Python | jQuery | JavaScript | CSS | HTML | Git |

Full-stack website that incorporates user authentication functionalities such as user sign-up, email verification, and login. It offers a range of front-end controls for both visitors and administrators. The project involved writing approximately 6,800 lines of Python code.

WARWICK HART.developer (); - <https://github.com/BobWritesCode/portfoli-website>

TypeScript | jQuery | JavaScript | Bootstrap | CSS | HTML | Git |

Portfolio website designed for a developer to showcase their skills, portfolio, certifications, and more. The website features a sleek mobile-first design, ensuring a seamless user experience on both PC and mobile devices. TypeScript is used to implement modularization, allowing for easy addition of future content.

Hotdog Empire Tycoon - <https://github.com/BobWritesCode/ci-Project3>

Python | API | Git | Heroku |

Python-based tycoon game where players have a set time of 20 days to amass wealth and strive to secure a position on the leader board. The game utilizes an API that enables users to save their progress and resume the game later.

Random Result Generator - <https://github.com/BobWritesCode/ci-Project2>

JavaScript | CSS | HTML | Git |

JavaScript displaying the results like a raffle/lottery draw. Allows users to input potential winning results and customize the number of results to be shown. Additionally, users can personalize the visual display of the results.

Why Choose Popcorn? - <https://github.com/BobWritesCode/ci-Project1>

HTML | CSS | Git |

"Why Choose Popcorn?" is an introductory project that focuses on HTML, CSS, and Git, providing an opportunity to grasp the fundamentals of web design. The project emphasizes a mobile-first design approach, ensuring optimal functionality and user experience across different devices.

International Medical Insurance Sales Quote Tool

Excel | VBA | HTML |

This project involved developing a new sales quote tool using Excel, VBA, and HTML to replace an outdated system for international medical insurance sales in the UK and EU markets. The new tool improved the productivity of the sales team, provided a better user experience, and allowed for instant quotes that could be exported into an email template and sent to customers.

GTA V online & Read Dead Redemption online.

Lua | HTML | CSS | JavaScript |

These projects involve working with Lua, HTML, CSS, and JavaScript to explore and learn gaming LUA code as well as using APIs to facilitate communication between different programming languages, specifically LUA and JavaScript. These projects are personal passion projects aimed at enhancing gaming skills and knowledge.

Certifications

- **Full stack developer diploma (Distinction)** with Code Institute.
- **Intermediate TypeScript course** with Code Academy.
- **Learn TypeScript** with Code Academy, covering fundamentals, functions, object types, complex types, union types, and type narrowing.
- **Simplifying Web Development with Accessibility Best Practices** with LinkedIn.
- **Django skill assessment badge** with LinkedIn.
- **Git skill assessment badge** with LinkedIn.
- **Git Essential Training: The Basics** with LinkedIn.
- **HTML Essential Training** with LinkedIn.
- **HTML skill assessment badge** with LinkedIn.
- **CSS skill assessment badge** with LinkedIn.
- **5-day coding challenge** with Code Institute.

Education

- **Code Institute**, May 2022 until May 2023.
- **Varndean College**, September 2004 until July 2006.
- **Dorothy Stringer High School**, September 2002 until July 2004.
- **Falmer High School**, September 1999 until July 2002.

Qualifications from College and School

- **A2 qualifications** in Computing, photography, and mathematics.
- **AS qualifications** in Computing, ICT, and electronics.
- **GNVQ qualifications in ICT**, Numerical modelling using spreadsheets; Presenting information; Handling information; Graphics and desktop publishing; Information technology.
- **GCSE qualifications C grade and above** in English, mathematics, double science, electronics, and 6 other GCSE qualifications.

Professional Experience

- **Direct Sales Adviser, Bupa Global**, January 2017 to Present.
- **Branch Manager, Post Office Ltd**, December 2015 to December 2016.
